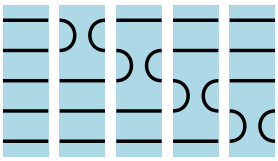
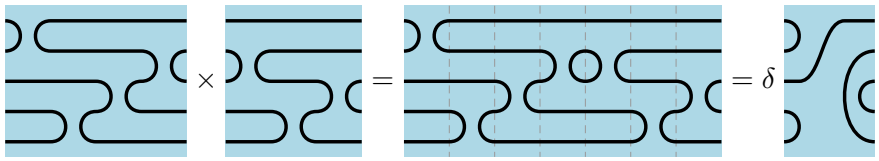
The generators of $TL_5(\delta)$ are:

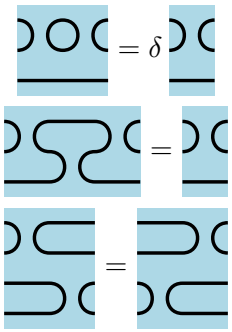


From left to right, the unit 1 and the generators e_1, e_2, e_3, e_4.

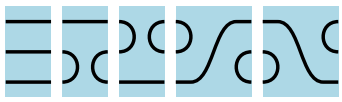
Multiplication on basis elements can be performed by concatenation: placing two rectangles side by side, and replacing any closed loops by a factor δ, for example $e_1e_4e_3e_2 \times e_2e_4e_3 = \delta\, e_1e_4e_3e_2e_4e_3$:

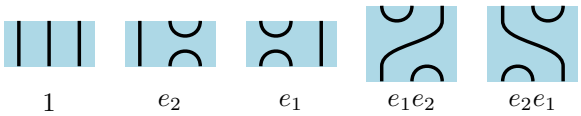


The Jones relations can be seen graphically:



The five basis elements of $TL_3(\delta)$ are the following:



From left to right, the unit 1, the generators e_2, e_1, and e_1e_2, e_2e_1.


The same, drawn vertically and with names:
